

# Vaccine Factsheet!

**1** Immunisation is one of the most cost-effective public health interventions, averting an estimated 4.4 million deaths yearly.

**2** The measles vaccination alone has had a huge impact, saving 94 million lives over the last 50 years!

**3** Global immunisation efforts have saved at least 154 million lives over the past 50 years.

**4** Global tetanus vaccination programs reduced tetanus deaths in newborns by 95% in the last 30 years.

**5** As the result of vaccination against polio more than 20 million people are able to walk today who would otherwise have been paralysed.

**6** Because of vaccination, infant mortality rates have plummeted over the last 50 years.
